About the International Seminar

There is undoubtedly a strong bond between society and people through **“Music in Cinema”**. Linked with these two is the cinema as it relates to the society. In the midst of scientific advancements, the real face of the society seems to be lost because of which it is important to make people recognise the true identities and concerns, so that they can understand the social surroundings and personas. The objective of the international seminar entitled, **“Music in Cinema”** is to set a positive trend and make the event a tradition in itself. The debates and dialogues, Presentation or screening which would focus on the **“Music in Cinema”** would give a deep and penetrating view of the complex society we are living in today. Through the seminar we intend to take a step forward in this direction as the deliberations in the seminar will lead on to some concrete suggestions.
